Software Development Portfolio

Blackjack Game | [kannyg87/blackJack \(github.com\)](https://github.com/kannyg87/blackJack) January 2021

- Solo Developer, building an interactive implementation of blackjack game. Worked with pure JavaScript, CSS, HTM to build the feature to fetch the cards to the bords and determine who is the winner!

Node Band | [kannyg87/Node_Band \(github.com\)](https://github.com/kannyg87/Node_Band) January 2021

- Solo Project, to develop a band web page shows the most recent album, links to Spotify and purchases, and feedback page, built with JavaScript, JSON, EJS, CSS, SASS and HTML.

RPG Game | [kannyg87/RPG \(github.com\)](https://github.com/kannyg87/RPG) November 2020

- Text RPG game including battles, markets, and randomized enemies. Built with Python3, demonstrated OOP.

Zodiac Travel Destination | [Mattie-07/GroupProject \(github.com\)](https://github.com/Mattie-07/GroupProject) December 2020

- Group project to create a travel destination website based on your personal zodiac. My role was building the app with HTML5, CSS3, JavaScript, ES6, Bootstrap, Node.js, AOS animate-on-scroll library, AWS APIs, AJAX.

NEWS App | [Mattie-07/newsProject \(github.com\)](https://github.com/Mattie-07/newsProject)

- Group project to create an App for most recent news around the world. As the users can register their info and login into the page, giving them the ability to watch the News and chat with the other users. My role was designing login, registration page and develop the back-end for the registration page, also use the APIs for the main page. Built with HTML5, CSS, Bootstrap, Node.js, PostgreSQL, bcrypt, Helmets and socket.IO.

FinanncialApp | [GitHub - kannyg87/FinancialApp](https://github.com/kannyg87/FinancialApp) | <https://financialapp21.netlify.app/>

- Solo project developed by React-Redux using local storage to save your data, the main page has a form that collects the billing, cost, dates, and notes that you can add to table that can give you the total cost for your monthly payments and you can go to my chart to see which you pay most and least amount! using functional component and class base component also reducers and the actions.
